- If the writing is successful, and the XShell is restarted successfully with the command, but it cannot be found on the website (URL of the test environment <https://ecolinkdmp->

d.ecolab.com.cn/#/Device/dtuList) , please try hard restart directly (power off and restart the board).

3. If the writing is unsuccessful, please carefully check the writing steps. For example, if SN already exists in the board, the original SN number needs to be deleted. Whether it is necessary to restart the device.
4. How to send the file unsuccessfully? Please check the file size. Currently, the board supports files below 1M.
5. Write device, associated with software and hardware. If it fails, there may be problems in both aspects.
 - For software, please contact the software designer: xudong.xu@ecolab.com
 - For hardware (Device or Gateway), please contact the relevant designer:
jian.zhang3@ecolab.com; ying.zhang@ecolab.com; kai.chen@ecolab.com; yi.xiao@ecolab.com Etc
 - For computer related problems, please contact IT: chinait@ecolab.com
 - For SNAndPSK firing process, please contact: peiguo.yuan@ecolab.com
